OUR DOCTORS

Prof. Ross Baker

MBBS, BMedSc, FRACP, FACP, FRCPA

Clinical Haematologist & Haemato-Oncologist

Professor Ross Baker is a practising consultant haematologist, clinical researcher and is currently:

- Director Medical Services – Western Haematology and Oncology Clinics;
- Senior Consultant Haematologist – Hollywood Private Hospital;
- Director WA Centre for Thrombosis and Haemostasis – Murdoch University;
- Director Haemophilia Treatment Centre – Hollywood Private Hospital; and
- Chairman – Perth Blood Institute

Professor Baker's major interest is the translation of new scientific discoveries into clinical haematology practice. He has extensive clinical and laboratory experience in a wide range of haematological disorders and has been a consultant in haematology for over 25 years.

As Principal Investigator in, more than 125 large international phase II and III clinical trials, he has actively led and participated in clinical research in venous thrombosis, leukaemia, lymphoma, myeloma, thrombocytopenia, Von Willebrand disease and haemophilia.

He has authored over 127 papers in peer reviewed medical journals with high impact factor and has been a regularly invited speaker at international and national medical meetings.

He is a founding director and secretary of the Australasian Society for Thrombosis and Haemostasis (ASTH now THANZ), Founding Chair of the Perth Blood Institute and scientific advisor to the World Health Organisation on DVT in 2001.

He has enthusiasm for teaching medical and science students and supervises post graduate PhD, masters and honours research programs. He directs the Regional Training Scheme Program with Malaysia for specialist clinical and research training and mentoring with the International Society of Thrombosis and Haemostasis. He initiated Medical Science Encounter days for promising year 11 and 12 high school students, to enable them to have hands on laboratory research experience and to discover the power of science.
